Reserve A Table Feature For The the Little Lemon restaurant website.

SEWMINI DE SILVA

Problem statement

Little Lemon restaurant wants to introduce an easy-to-use "Reserve a Table" feature on their mobile website to improve customer experience and increase reservations. The current reservation process is either through phone calls or walk-ins, which is not convenient for customers who prefer online

Project overview

Feature Name:

Reserve a Table

Project duration:

One Month

Persona: **MASHA**

Problem statement:

Masha is a busy professional who values convenience and efficiency. She enjoys dining out but prefers making online reservations to avoid long waits and ensure a smooth dining experience.

""After a busy day at work, I crave a simple and convenient way to enjoy a nutritious meal. Little Lemon is my go-to place where I know I can unwind and savor my favorite dishes with minimal effort."

Goals

-Quickly and easily reserve a table at her favorite restaurant, Little Lemon.
-Receive immediate confirmation of her reservation.
-Modify or cancel the reservation if needed.

Frustrations

-Long wait times on phone calls.
-Uncertainty of walk-in availability

Masha

Age: 28
Education: Bachelor in Software Engineering
Hometown: Matara
Family: Single.Living alone with cat named kete
Occupation: Software Engineer

Masha is a busy professional who values convenience and efficiency. She enjoys dining out but prefers making reservations online to avoid long waits and ensure a smooth dining experience. For Masha, having an easy and reliable way to book a table at her favorite restaurants is essential to her routine.

Persona:Masha

Goal: To easily order a healthy meal from Little Lemon.

ACTION	Thinks of dining	Enters the mobile website	Reservation	Receives confirmation	Post-Reservation

Takeaways

What I learned:

Throughout the project I learned UX/UI principles and applied them to address customer issues. I redesigned the online ordering elements and created an intuitive table reservation feature.
